(54) NEW BEER AND ITS PRODUCTION

trin as a subsidiary raw material followed by brewing.

(57) Abstract:

PURPOSE: To obtain low-calorie beer having refreshing harmonized palatability, excellent bitterness not remaining afterward, excellent body feeling and flavor by adding to wort a saccharide containing a hardly digestible component from a raw material of baked dex-

CONSTITUTION: Wort is mixed with preferably 2-50wt.% more preferably 10-25wt.% (based on a saccharide in wort) of a hardly digestible component from a raw material of baked dextrin as a subsidiary raw material and brewed to give the objective low-calorie beer.
